

Spleen_OC (primary lung from Open Chromatin Group)

From: UNC/Duke/UTA/EBI Open Chromatin ENCODE group

Date: 5/1/12

Human Frozen tissues were obtained from the following organization:

National Institute for Child Health and Human Development (NICHD) Brain and Tissue Bank. The NICHD repository contains over 80,000 specimens as frozen tissues (stored at -80) retrieved from human autopsy and surgery. Sample IDs are provided to protect individual identity.

The NICHD Brain and Tissue Bank
University of Maryland School of Medicine
Department of Pediatrics
655 W. Baltimore Street, 13-013 BRB
Baltimore, MD 21201-1559
Phone: 1-800-847-1539 or 410-706-1755
btbumab@umaryland.edu

Availability of additional material. Because these samples were obtained from a limited amount of human tissue rather than a cell line, additional preparations may or may not be available. To find out if more tissue is available contact the NCTC (<http://www.ecu.edu/cs-dhs/med/NcTissueConsortium.cfm>) or NICHD (btbumab@umaryland.edu)

Samples used for FAIRE experiments: For FAIRE experiments, the source of tissue is indicated below. Replicate indicates the ID of the subject that was used for each experiment. Post mortem index (PMI) for each sample is indicated (where available).

FAIRE:

Replicate	Organization	ID	Disease	Age years	Sex	Race	PMI
B1	NICHD	1863	Control	30	Female	African American	7
B2	NICHD	4548	Control	20	Female	African American	5
